

B¹

collecting information at a first computer system;
organizing said information into a plurality of first web-sites, each of said first web-sites being addressable by a unique Universal Resource Locator (URL) and each of said first web-sites being identified by a physical location;
assigning one of said first web-sites to a user as a user web-site; and
selecting links to a plurality of said first web-sites for presentation on said user web-site based on a relationship between the physical locations identified by said first web-sites and the physical location identified by said user web-site.

B²

16. (Twice Amended) A method of providing information to a user comprising:
collecting information at a first computer system;
organizing said information into a plurality of first web-sites, each of said first web-sites being addressable by a unique Universal Resource Locator (URL) and each of said first web-sites being identified by a physical location;
assigning one of said first web-sites to a user as a user web-site;
selecting links to a plurality of said first web-sites for presentation on said user web-site based on a relationship between the physical locations identified by said first web-sites and the physical location identified by said user web-site; and
accessing said user web-site by a second user.

Sub C 7

17. (Twice Amended) A system for providing information to a user comprising:
a first computer system adapted to collect information and organize said information into a plurality of first web-sites, each of said first web-sites being addressable by a Universal Resource Locator (URL) and each of said first web-sites being identified by a physical location, said first computer system further adapted to assign one of said first web-sites to a user as a user web-site and present links to a plurality of said first web-sites on said user web-site based on a relationship between the physical locations identified by said first web-sites and the physical location identified by said user web-site.
